Plan for Adjacent toxic waste dump site is unacceptable + irresponsible! Doing so would (overtime) create health risks to those who fish the Willamette for food. Fish as food needs to be safe for all, especially the poor + those w/ limited means. Historical corporate polluters of the Willamette must be held responsible + finance major costs of clean-up. Corporate polluters must give public apology + reveal their practices that lead to contamination of the Willamette (b) (6)
